

■ YOUR AI MONEY MACHINE

THE BEST AI CONTENT GENERATORS

Create More. Work Less. Let AI Do The Heavy Lifting.

■ THE ONE-TO-FIVE SYSTEM: One idea. One prompt to ChatGPT. Five pieces of content — video script, Instagram caption, TikTok hook, email, blog post. All generated in under 10 minutes. This is how one creator produces what used to require a team.

THE ONE-PROMPT CONTENT SYSTEM

Here is the system that turns one idea into five pieces of content using a single ChatGPT prompt.

■ **THE MASTER CONTENT PROMPT:** I am creating content about [topic] for [audience]. Generate all five of the following from this single topic: 1. A 90-second TikTok/Reels video script with a strong hook 2. An Instagram caption under 150 words with 10 hashtags 3. A TikTok hook under 10 words that stops the scroll 4. An email newsletter intro paragraph (75 words) 5. A blog post introduction (100 words) Tone: [your tone]. Make all five feel connected but distinct.

THE WEEKLY CONTENT CALENDAR PROMPT

1 Monday Planning

Ask ChatGPT: Give me 7 content ideas about [your niche] for this week. Each idea should cover a different angle — educational, entertaining, personal, motivational, promotional, behind-the-scenes, trending. Include the hook for each.

2 Batch Create

Pick your top 3 ideas. Run the master content prompt above on each one. You now have 15 pieces of content — videos, captions, hooks, emails, and blog posts — all from 3 ideas.

3 Schedule and Post

Load all 15 pieces into Buffer (free) and schedule them across the week on all platforms. One Monday session. A full week of content. Done.

■ **THE BOTTOM LINE:** You do not need a content team. You need one system — one idea, one master prompt, five pieces of content. Run this every Monday and your content calendar fills itself. Consistent content builds your audience. Your audience buys your products. AI makes both happen faster.
