

## ■ YOUR AI MONEY MACHINE

# THE COMPLETE AI CREATOR STACK

No Team. No Studio. No Daily Editing. Just Results.

■ THE BIG PICTURE: A single creator using these five tools can produce content that used to require a writer, a video producer, a voice actor, an editor, and a social media manager. That is five roles — all replaced by five free tools. This guide shows you exactly how they connect.

## THE FIVE-TOOL CREATOR PIPELINE

### 1 CHATGPT — THE WRITER

Writes every script, caption, hook, email, and blog post. Give it context, topic, audience, and tone. Get a first draft in seconds. Every piece of content starts here. Free tier available at [chatgpt.com](https://chatgpt.com).

### 2 ELEVENLABS — THE VOICE

Clones your voice from 3 minutes of audio. Reads any script back in your exact voice. Use the same voice clone for every video — your voice working 24/7 without you recording. Free tier at [elevenlabs.io](https://elevenlabs.io). Affiliate link: <https://try.elevenlabs.io/aq4p2th2qjgm>

### 3 HEYGEN — THE VIDEO

Generates a photorealistic AI avatar from one video you record. Your avatar reads any script in your cloned voice. No camera. No studio. No reshoots. You record yourself once — HeyGen produces every video after that. [heygen.com](https://heygen.com)

### 4 CAPCUT — THE EDITOR

Adds captions automatically. Removes silence. Adds music. Formats for every platform in one click. Free. Available on mobile and desktop. [capcut.com](https://capcut.com)

### 5 BUFFER — THE DISTRIBUTOR

Schedules and posts to TikTok, Instagram, YouTube, and Pinterest automatically. You load the content once. Buffer posts it at the optimal time on every platform. Free tier for up to 3 channels. [buffer.com](https://buffer.com)

## THE END-TO-END WORKFLOW

---

<b>1</b>	<b>Generate The Script</b> Open ChatGPT. Use this prompt: Write a 90-second TikTok script about [topic] for [audience]. Hook in the first 7 seconds. Teach one specific thing. End with a CTA to my free guide at YOURAIMONEYMACHINE.COM. Tone: educational but conversational.
<b>2</b>	<b>Create The Voice</b> Paste the script into ElevenLabs. Select your voice clone. Generate the audio. Download the MP3. Takes 30 seconds.
<b>3</b>	<b>Generate The Video</b> Upload your script and audio into HeyGen. Select your avatar. Generate the video. Takes 5-10 minutes depending on length. Download the MP4.
<b>4</b>	<b>Edit and Caption</b> Import the MP4 into CapCut. Use Auto Captions to add subtitles. Trim any dead space. Add background music at 20 percent volume. Export for TikTok format.
<b>5</b>	<b>Schedule and Post</b> Upload to Buffer. Write your caption (use ChatGPT). Add hashtags. Schedule to all four platforms. Done. Total time from idea to scheduled — about 45 minutes.

## WHAT EACH TOOL COSTS

---

<b>CHATGPT</b>	Script writing, captions, hooks, emails	<b>Free</b>
<b>ELEVENLABS</b>	Voice cloning and audio generation	<b>Free tier</b>
<b>HEYGEN</b>	AI avatar video generation	<b>Free trial</b>
<b>CAPCUT</b>	Video editing and captioning	<b>Free</b>
<b>BUFFER</b>	Social media scheduling	<b>Free — 3 channels</b>

■ THE BOTTOM LINE: One person with this stack produces what used to require five people. The content builds your audience. The audience downloads your free guides. The guides drive sales. AI makes the whole machine run. Start with ChatGPT and HeyGen. Add the others one at a time. Within 30 days your full creator operation is running.

*Results vary. Educational purposes only. Not financial or professional advice.*
